PROGRAM DURATION

01 Oct 2026 – 31 Mar 2027

MODEL

2 Months Training + 4 Months
Internship

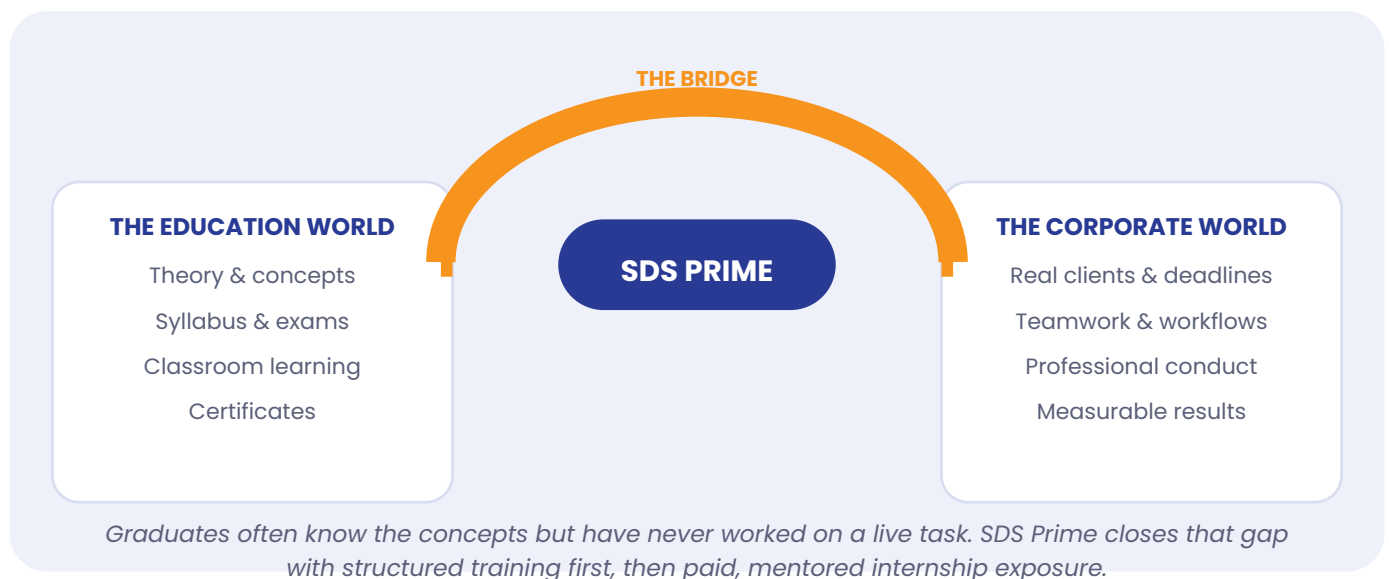

STIPEND

₹3,000 / month from Month 3

About SDS Prime

SDS Prime — A Hub of Digital Promotion — is based at AT News House in Aligarh. We work where content, creativity, technology and marketing meet, and our training is built around how a real digital-promotion workplace operates.

The Job-Ready Training Program was started with one thought: **to connect the educational world and the corporate world** and to be the bridge between them. Here, learners do not wait until the end of a course to apply what they know. They learn a concept, practise it the same day, and then use it on real work.

WHAT MAKES THE BRIDGE WORK

Learn

Domain-specific training with concepts explained through workplace examples.

Apply

Every class ends with a guided practical, and every week with a project or assessment.

Perform

From Month 3, interns work on real-time assignments in a professional workflow.

WHO THIS PROGRAM IS FOR

Students

Who want practical skills alongside, or right after, their studies.

Fresh graduates

Who want workplace exposure and a portfolio before the job hunt.

Career switchers

Who are starting fresh in a new field. Beginner-friendly across domains.

Mission, Vision & Objectives

OUR MISSION

To bridge the gap between education and the corporate world by giving every learner structured training, real-time practice and workplace exposure, so they step into their first job with skills, a portfolio and confidence.

OUR VISION

To be the most trusted launchpad for young professionals: a place where learning and working happen together, and where every learner grows into an industry-ready professional.

PROGRAM OBJECTIVES

01

Build practical, industry-relevant skills in the learner's chosen domain.

02

Provide exposure to real-time assignments, projects and professional workflows.

03

Develop workplace discipline, communication, teamwork and professional confidence.

04

Create a stronger foundation for internships and entry-level career opportunities.

OUR LEARNING MODEL: LEARN, PRACTISE, APPLY, GROW

LEARN

Months 1-2

Structured domain training with guided learning and skill-building.

PRACTISE

Every week

Guided practicals, assignments and a weekly project or review.

APPLY

Months 3-6

Practical internship exposure with real-time work and mentorship.

GROW

On completion

Portfolio, certification, career guidance and a Goa celebration trip.

**We don't just teach skills.
We build workplace readiness.**

SKILLS

Domain expertise

EXPOSURE

Real workflows

CONFIDENCE

Job-ready mindset

Web Development (AI-Powered)

06

From your first line of code to real-world projects, with AI as your coding partner.

DURATION

8 Weeks · 40 Learning Days

FORMAT

Learn, practise, then build — daily practice tasks

LEVEL

Beginner · no coding experience needed

FINAL OUTPUT

6 mini projects on GitHub + Phase 1 showcase

PHASE 1 · MONTHS 1–2 · WEEK-WISE STRUCTURED TRAINING

WEEK	FOCUS & TOPICS COVERED	PRACTICAL OUTPUT
WEEK 01	Web Basics & HTML How the web works, programming logic, HTML fundamentals, links, images & lists, tables, first AI prompts	About Me page + multi-page site
